Amendments to the Drawings:

Attached hereto is a new drawing sheet for Fig. 6A. It is respectfully requested that the attached drawing sheet be added to the Figures. Fig. 6A corresponds to an embodiment described in the specification as filed at least at page 14, lines 10-22. As such, no new matter has been added.

REMARKS

The above amendments and these remarks are in response to the Office action mailed September 22, 2005. The Examiner indicated that Claims 23, 29, 38-43, 51-54 and 59-63 would be allowable if amended to include the limitations of all intervening claims. The Examiner further indicated that Claim 12 would be allowable if amended to include the limitations of all intervening claims and to overcome the rejection under §112, Second Paragraph.

Even though the Examiner indicated all of Claims 12, 23, 29, 38-43, 51-54 and 59-63 could be placed in an allowable form, in an effort to expedite allowance of the present application, Applicants have decided to pursue a subset of the indicated allowable claims, namely Claims 24 (formerly Claim 29), 43, 51, 54 and 63. More specifically:

<u>Claims 4-23</u> have been canceled as duplicative.

Independent Claim 24 has been rewritten to include the limitations of dependent Claim 29. (The Examiner indicated Claim 29 would be allowable if amended to include the limitations of all intervening claims. Claim 29 was dependent on Claim 24. Claim 24 has been amended to include the limitations of Claim 29.)

Claims 25-28 depend on Claim 24.

Claims 30-39 have been canceled as duplicative.

Claim 40 depends on Claim 24.

<u>Claims 41-42</u> have been canceled as duplicative.

Newly independent <u>Claim 43</u> has been rewritten to include the limitations of Claim 30. (The Examiner indicated previously dependent Claim 43 would be allowable if amended to

include the limitations of independent Claim 30. Claim 43 has been amended to include the limitations of independent Claim 30, thereby making Claim 43 independent.)

Claims 44 depends on claim 43.

Claims 45-50 have been canceled as duplicative.

Newly independent <u>Claim 51</u> has been rewritten to include the limitations of claim 4. (The Examiner indicated previously dependent Claim 51 would be allowable if amended to include the limitations of independent Claim 4. Claim 51 has been amended to include the limitations of independent Claim 4, thereby making Claim 51 independent.)

Claims 52 -53 have been canceled as duplicative.

Newly independent <u>Claim 54</u> has been rewritten to include the limitations of claim 30. (The Examiner indicated previously dependent Claim 54 would be allowable if amended to include the limitations of independent Claim 30. Claim 54 has been amended to include the limitations of independent Claim 30, thereby making Claim 54 independent.)

<u>Claims 55 and 56</u> have been made to depend on Claims 43 and 51, as amended, respectively.

Claims 57 - 62 have been canceled as duplicative.

Newly independent <u>Claim 63</u> has been rewritten to include the limitations of claim 30. (The Examiner indicated previously dependent Claim 63 would be allowable if amended to include the limitations of independent Claim 30. Claim 63 has been amended to include the limitations of independent Claim 30, thereby making Claim 63 independent.)

As applicants have amended the above-identified claims in a way that was indicated by the Examiner to be allowable, it is respectfully requested that these claims be passed to issue.

Objection to the Specification

The specification has been objected to for failing to recite the priority information. Applicants respectfully point out that the priority information showing priority back to December 29, 1995 was filed in an amendment on January 30, 2004. A copy of that amendment printed off of the USPTO Patent Application Information Retrieval (PAIR) database is attached hereto as Exhibit A.

Objection to the Claims

Claims 4, 5, 13, 17, 24 and 30 have been objected to as including informalities. These informalities have been corrected and it is respectfully requested that the objection on these grounds be withdrawn.

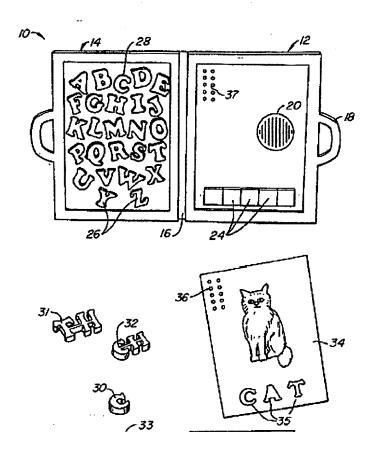

Rejection of Claims 10-12 and 35-38 Under 35 U.S.C. §112, Second Paragraph

Claims 10-12 and 35-38 stand rejected under 35 U.S.C. §112, Second Paragraph. These claims have been canceled, and it is respectfully requested that the rejection on these grounds be withdrawn.

Rejection of Claims Under 35 U.S.C. §102(e) and 103

Original claims 4-5, 9-11, 13-14, 17-19, 21-22, 24-26, 28, 30-31, 35-37, 44-50 and 55-58 stand rejected under 35 U.S.C. §102(e) as being anticipated by U.S. Patent No. 5,511,980 to Wood (Wood). Although many of these claims have been amended or canceled, Applicants respectfully submit that each of the recited claims, prior to cancellation or amendment, is patentable over Wood.

Wood discloses a system including five pushbutton keys 24 in combination with cutouts 35 on a card 34. The relevant portions of Figure 1 of Wood are reproduced below for the convenience of the Examiner.

The cutouts 35 on the card 34 force the letters into specific positions on specific pushbutton keys. The child has no option to place a letter anywhere other than its corresponding cutout. If the correct letter is placed in its corresponding cutout, the processor simply indicates that the letter is present.

The following are some of the limitations from the claims, prior to amendment or cancellation, which are nowhere disclosed, taught or in any way suggested in Wood:

- "the processor enclosed within the housing receiving information from the sensing system corresponding to sensed occurrences of contact by the child on the work platform in response to the question or instruction and using the information to evaluate whether the child's cognitive selections as indicated by the child caused contacts with the work platform correspond to a correct solution to the question or instruction".
- "at least a portion of a sensing system, the sensing system sensing occurrences of contact caused by the child with the work platform and sending information to the processor corresponding to one or more sensed occurrences of contact and sensing the lateral movement of a child-caused contact across a face of the work platform while the contact is maintained with the work platform and sending information to the processor corresponding to the path of the lateral movement of the child-caused contact across the face of the work platform".
- "a plurality of images presented on the work platform to the [child] to facilitate the interaction between the [child] and educational software, wherein the images presented on the work platform are changed from time to time".
- "a plurality of images presented on the work platform to the [child] to facilitate the interaction between the [child] and ...educational software".
- "a plurality of images presented on the work platform to the [child] ... wherein the images presented on the work platform are changed from time to time".

As the above claim limitations are nowhere disclosed, taught or in any way suggested in Wood, it is respectfully submitted that each of these claims are patentable over Wood. Nevertheless, Applicants have amended and canceled claims in the application in order to put the claims in a form that was indicated to be allowable by the Examiner and to expedite allowance of the application.

Applicants further submit that the disclosure of U.S. Patent No. 4,968,255, alone or in combination with Woods, does not support the rejection of original claims Claims 6-8, 15-16, 20, 27, and 32-34 under 35 U.S.C. 103(a).

As applicants have amended the application to recite only subject matter indicated by the

Examiner to be patentable, it is respectfully requested that the above-identified application be

passed to issue.

The Examiner's prompt attention to this matter is greatly appreciated. Should further

questions remain, the Examiner is invited to contact the undersigned attorney by telephone.

The Commissioner is authorized to charge any underpayment or credit any

overpayment to Deposit Account No. 501826 for any matter in connection with this response,

including any fee for extension of time, which may be required.

Respectfully submitted,

Date: December 12, 2005

Brian/I Marcus

<u>AMENDMENT</u>

Commissioner of Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

Please amend the above-identified application as follows:

Amendments to the specification begin on page 2 of this Amendment.

Remarks begin on page 3 of this Amendment.

Please amend the above-identified application by adding the following beginning at the first line on page 1 of the application:

- The present application is a continuation of U.S. Patent Application Serial No. 10/260,965, filed September 30, 2002, currently pending;

which is a continuation of U.S. Patent Application Serial No. 09/127,111, filed July 31, 1998 and issued as U.S. Patent No. 6,464,503;

which is a continuation of U.S. Patent Application Serial No. 08/890,294, filed July 9, 1997 and issued as U.S. Patent No. 5,823,782;

which is a continuation of U.S. Patent Application Serial No. 08/581,437, filed December 29, 1995, now abandoned. --
